Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

OMFS Section	Procedure Code	Modifier	DESCRIPTION	OMFS RVU	OMFS CF	Reduction Percent	12-xx-04 OMFS Maximum

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

OMFS Section	Procedure Code	Modifier	DESCRIPTION	OMFS RVU	OMFS CF	Reduction Percent	12-xx-04 OMFS Maximum

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

Formatting note: Codes with Professional and Technical Splits. Modifier 26 & TC

Codes with both a professional and technical component will appear on three consecutive lines in the table. The first line represents the professional component, the second line represents the technical component and the third line represents the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line. When a code is either 100% professional or 100% technical, it will appear on two consecutive lines. The first line will indicate whether it is professional or technical and the second will give the Global value. The OMFS RVU, OMFS CF and the Reduction Percentage will only appear on the Global value line.

OMFS Section	Procedure Code	Modifier	DESCRIPTION	OMFS RVU	OMFS CF	Reduction Percent	12-xx-04 OMFS Maximum
